                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          on May 5, 2003 this sequence version replaced gi:30377055. Contact: Genoscope contact: Genoscope 2 rue Gaston Cremieux, CP 5706 - 91057 EVRY cedex - FRANCE Email: seqref@genoscope.cns.fr, Web: www.genoscope.cns.fr rest strand cDNA was primed with a Norl-oligo(dT) primer. Five prime and enriched, double-strand cDNA was digested with Nor I and Cloned into the Not I and ECOR V sites of the pGNYSORT & vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen. This sequence belongs to sequence cluster

1st strand cDNA was primed with a Not1-oligo(dT) primer. Five prime
end enriched, double-strand cDNA was digested with Not I and cloned
into the Not I and ECORV sites of the pCMVSPORT 6 vector. Library
was not normalized. Library was constructed by Life Technologies, a

EST project with full-length enriched cDNA libraries carried out in Animal Genome Research Program (Japan) by National Institute of Agrobiological Sciences and STAFF-Institute
Single pass sequencing of clones derived from oligo-capped cDNA library
Vector sequences were eliminated by RepeatMasker version 2002/07/13
and crossmatch version 0.990319
Low quality bases were trimmed based on the quality values.
                                                                                                                                                                                                                                                                               /mol_type="mRNA"
